ABOUT US

Mr. Balakrishna is Founder & Managing Director at Balakrishna Associates. I completed my master's degree in agriculture. I had a vision and mission in growing large trees instead of cutting them. Then we began tree transplanting service from 2012. Now we are specializes in transplanting mature trees. Some of the best horticulturists were roped in to ensure that these trees survived during the transplantation process.

We are one of the largest tree transplanters in Telangana, Amaravathi, Tamil Nadu & Karnataka States and also we transplanted almost 7000 trees upto now. Whether you need to transplant a tree or move it from your yard or city. We have the most modern equipment and highly qualified staff of employees, which is the best combination for a successful tree transplant!

OUR SERVICES

Tree Transplantation

Tree Transplantation is a good process for not cutting trees and giving birth to the same plant by replacing it in somewhere. We all know that today plants became less due to pollution and growing technology. We are here to provide transplant services. We have professional team in the transplant section that have the ability to handle carefully. They are experts in tree transplants and who can cut the entire strand without damaging the roots and replace it elsewhere.

Landscape Designer

Balakrishna Associates is one of the leading landscape designers 4 states. We provide guidance on the latest designs and trends. We have experienced landscaping professionals to do the work in the time according to the architectural design.We are here to create your dreams and our landscaping professionals had a vast experience in the architectures like Residences, Gated Communities, Shopping Malls, Public Parks, Tourist Centers, Schools & College Grounds, Cricket & Football Grounds, Hotels and etc.

Landscape Maintenance

The beauty of the residence is based on the surroundings and the surrounding areas covered with plants look attractive and also give fresh air to the people. Maintaining these plants is a difficult task and you need a lot of experience in plant management at any season. For maintenance we have professional workers who were well trained and can easily identify the diseases, our professionals act and take good precautions to make them by injecting proper medications to the plants.
